L/Gen Phillip B. Davidson
Deputy Assistant Secretary of Defense
(Resources & Management)
Room 3C200
The Pentagon
Washington, D. C.

Dear Phil,

I would like to pass on my compliments for a job well done on the recce study. I am particularly intrigued with the prospect of extending the evaluation methodologies in a more comprehensive way so as to assist us in our mutual search for output measurements. As you have probably learned, Colby made a particular point of this at the USIB and has asked me to pursue the matter. I am assigning to [] of my staff, the responsibility to work with the data to see what we can do to expand its usefulness. I would expect Stan to work pretty closely with [] or his designee, if this is OK with you. Whatever evolves, be sure I fully recognize the limitation of evaluation data as reflected in the recce study for resource judgments. The variables are many but the current effort is a good starting point.

Sincerely,

[]
Intelligence Community Comptroller
